Window Vogue*

Some Practical Reasons for the New Window Vogue in Charming Homes

New

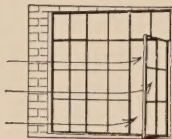

Fenestra Casements are cleaned on the outside from the inside—no sitting backwards on the sill.

Old

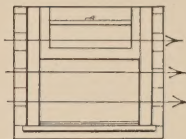

New

Extended swing-leaves deflect into the rooms any breeze that may be blowing parallel to the walls.

Old

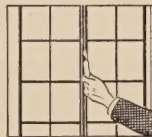

Fenestra Casements always open easily, for their solid rolled steel bars never warp, swell, or stick.

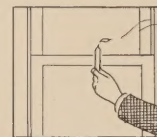

Inside screens, protected from rust and dirt, keep dainty curtains clean and need never be removed.

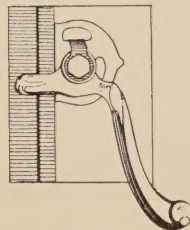

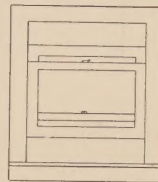

Fenestra Casements admit about 20% more light than wood windows having the same overall size.

Scientific design and accurate workmanship make Fenestra Casements close snugly tight.

With Fenestra Casements, the entire window opening can be used to provide fresh air ventilation.

The ornamental bracket—an exclusive Fenestra feature—and the graceful locking handle enhance the beauty of small panes and slender muntins.

Fenestra Casements Add Distinctive Charm to Any Style of Architecture

NORMAN FRENCH architecture, exemplified in this medium-size home, acknowledges the casement window as an essential. Fenestra Casements are equally as attractive in an Italian setting, and can be glazed with leaded glass for decorative effect.

A LONG ISLAND country home of charming English design. Fenestra Casements, with their small panes, give each window opening a texture that blends with the quaint pattern formed by the combination of brick, stone, stucco and timber.

IN the striking Spanish design of this California home, the sturdy steel bars of the Fenestra Casements are thoroughly in keeping with the massive masonry and the protecting grilles, while the small glass lights lend a pleasing variation to the whole.

EQUIPPED with Fenestra Casements, Colonial-type homes, such as this attractive example, gain in appearance as well as in window usefulness. Fenestra Casements are equally appropriate in Dutch and other variations of Colonial architecture.

The New Window Vogue – Cozier, Brighter Rooms at Low Cost

Fenestra

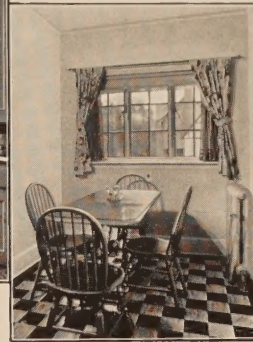

ROLLED STEEL

CASEMENT WINDOWS

A friendly kitchen, cool and airy in summer, bright and cheerful through the winter.

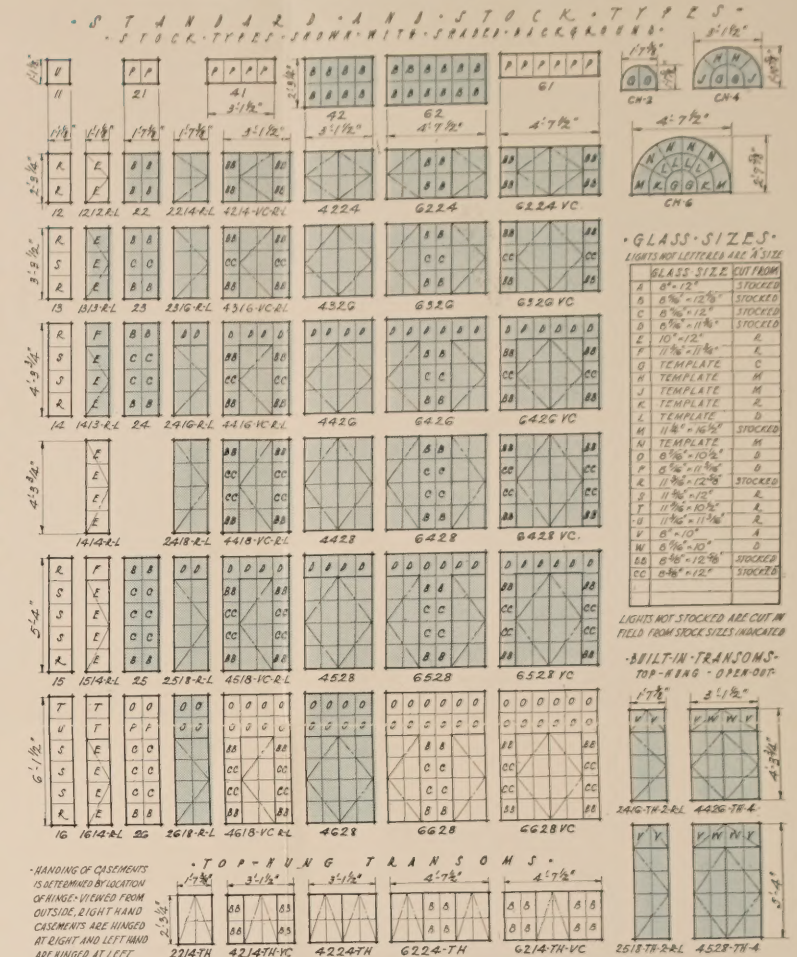

With Fenestra Casements, the breakfast room is everything it should be—a delightfully pleasant place to start the day.

A Size for Every Window Need

Sizes shown with blue background stocked in Fenestra warehouses and by Fenestra dealers for immediate delivery. Other sizes fabricated at factory on order from pre-cut bars.

In the Basement, Too!

There's a new window vogue for the basement, too—Fenestra Steel Basement Windows. They provide from 40% to 80% more light than wood windows of the same over-all size, making the basement bright, airy, and usable.

Fenestra Basement Windows are made from the same kind of rolled steel bars as Fenestra Casements. They are attractive in appearance, and always open easily and lock tightly shut, without rattling, warping, sticking, swelling, or shrinking.

Four standard sizes stocked by lumber, building supply and hardware dealers work into any kind of construction and cost as little as wood windows.

What the New Window Vogue Means to You

In establishing a new window vogue for homes both large and small, Fenestra Steel Casements bring to home-builders everywhere the sparkling beauty of small panes and slender muntin-bars, plus many practical advantages, at no increased cost.

Screened inside, these better steel windows set off the full beauty of the home exterior, unmarred by the dull ugly rectangles of outside screens. At the same time, inside screening, shielded from dirt, keeps the daintiest curtains clean and fresh. Plate glass, obtainable with Fenestra Casements at the price of ordinary glass enhances both the outside and the inside appearance of the home.

There's extra sunlight and fresh air, with Fenestra Casements. Slender steel bars shut off almost none of the light, and at a finger-touch, the swing-leaves open wide to welcome the breezes or lock tightly shut against the storms. Remember, too, that rolled steel bars can never warp or rattle, swell or shrink—these are windows that open easily or stay snugly shut in any climate, any weather.

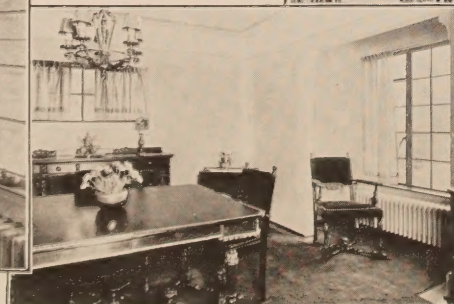

And think of windows you wash from the inside, without leaning out backwards! Extension hinges, sturdy yet inconspicuous, hold the opened swing-leaves far enough away from the wall to give easy access to the outside of the glass.

All of these advantages are essentials of a modern, comfortable home, whether it be built of brick, stone, tile, stucco, wood or any combination of materials. And you can afford Fenestra Casements, for they cost as little as ordinary windows—about two per cent of the house total.

Fenestra Casements, attractively curtained, give the living-room an air of coziness and hospitality

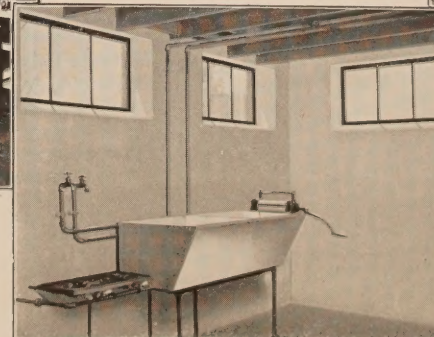

Small panes, patterned by slender muntin-bars, add just the right touch of daintiness in the bedroom.

Fenestra Casements make a well-lighted dining-room, impressive in its simplicity.

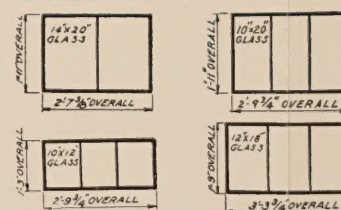

Daylighted with Fenestra Basement Windows, the basement can contain not only the laundry, but also a comfortable work-room for "Dad" or a play-room for the kiddies.
